NORMA DANI RISDIANDITA

Fractional CTO

at Widya Robotics & Widya Security

Jan 2025 – June 2026

WIDYA ROBOTICS

Led **technical presales** and **end-to-end delivery** for AI projects across Widya Robotics, serving as the **go-to technical owner** from client discovery and solution architecture through implementation and production deployment; helped close and deliver multiple commercial AI projects.

WIDYA SECURITY

Led **cybersecurity initiatives** at Widya Security, including developing **LLM-powered VAPT reporting platform** that accelerated penetration-testing report generation.

COMMERCIAL AI PROJECTS

Closed and delivered **multiple commercial AI projects**, including:

- Led development of a **RAG based clinical assistant** of Skin Clinic doctors: chatbot recommendation based on internal documents and stock checking for each clinic
- Architected and delivered **real time vehicle counting, classification, License Plate Recognition** system for harbor operations, processing **5,000+** of vehicle detections per day using YOLO, MobileNetV3, PyTorch/TensorRT, FastAPI, RabbitMQ, and Docker. (Widya Robotics)
- Closed and led delivery of a **real-time computer-vision system for fertilizer-bag counting**, processing **thousands of bags per day** in production. (Widya Robotics)

From presales to production: AI delivery across Widya Robotics & Widya Security.
