Data Scientist & ML Engineer

Mar 2019 – Dec 2020

at Sorabel, Datanest, Azima

---

01 · SORABEL

SORABEL

Developed **market-basket analysis** and **search/recommendation models** for fashion e-commerce.

STACK

Python | NumPy | SQL (BigQuery)

02 · DATANEST

Datanest

Built **demand-forecasting** and **time-series models** to predict when retail customers were likely to reorder, enabling sales teams to proactively prioritize and time customer outreach.

STACK

scikit-learn | TensorFlow | XGBoost

03 · AZIMA

AZIMA AI

Built an **end-to-end conversational commerce and logistics system** where customers ordered products via **WhatsApp** using text or images; implemented **custom NLU** and **computer vision OCR** for order-to-product mapping and **VRP-based optimization** for automated delivery routing.

STACK

NLU | Computer Vision | Dialogflow | Text fuzzy matching | Search algorithm | Vehicle Routing Problem

From fashion recommendations to WhatsApp orders: ML inside real products.

Data in, decisions out.
